For : APPARATUS EQUIPPED...
Art Unit : 2622
Examiner : M. Nguyen
Dated : November 7, 2002

Hon. Commissioner of Patents
and Trademarks
Washington, D.C. 20231

INFORMATION DISCLOSURE STATEMENT

Attached please find Form PTO-1449 together with the references as discussed below.

The above listed present application is a divisional of application No. 08/964,257, of which there were two continuations and one RCE filed, along with another divisional application No. 09/881,529. Applicant made a bonafied attempt to provide references to the U.S. Examiner as they became available for each and all of the aforementioned application files. Upon review of the files, applicant is unsure if all of the discovered references have been cited in each and all of the related applications.

Applicant presents below an IDS and PTO 1449 form containing references which applicant suspects may have not been cited for the present application (serial No. 09/407,446). Since applicant has made a bonafied attempt to properly disclose discovered references to the U.S. Examiner for the present application, applicant respectfully requests that the below listed references be reviewed by the

Examiner for the present application. Should any IDS fee be required, it is requested that such fee be charged to our deposit account No. 13-0410. Favorable action is respectfully requested on the merits of this submission.

The following references have been ascertained from numerous sources including notices of allowance for associated U.S. applications, U.S. office actions, international search reports, foreign office actions etc. Should the Examiner wish more information relating to the pertinency of any reference, the Examiner is requested to contact applicants representative, who will try to ascertain additional information.

U.S. 4,677,253 discloses an optical line scanning device for scanning images. This reference may have been incorrectly described in previous IDS documents.

U.S. 5,274,477 discloses an electrophotographic facsimile apparatus with a pivoted upper structure containing an image recording head.

U.S. 5,359,435 discloses a facsimile apparatus which can supply un-warped recording sheets.

U.S. 5,579,129 discloses a reading and information processing apparatus with a pre-scan mode for reading a color reference member before an original is read.

U.S. 5,710,634 discloses an output apparatus and method for reading and recording that determines whether a sheet set in a feeder position is a print sheet or an original document.

U.S. 5,731,885 discloses a recording apparatus with an opening in the body of the apparatus accessing the conveyance path to allow the removal of a piece of paper which has stopped in the conveyance path.

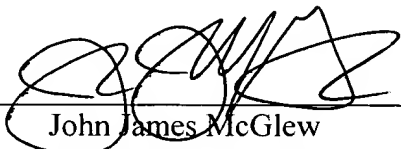

U.S. 5,896,206 discloses a printer/scanner having a single paper path with pen door actuated

pinch rollers.

U.S. 6,064,498 discloses an image forming apparatus with multiple trays for recording documents and printing documents.

JP 64-16758 discloses a facsimile machine with an image sensor and a movable reading device.

Respectfully submitted
for Applicant,

By:
